Well, until I play them...

We put a new pickguard on this guitar and some inserts in the neck and some new pickups. I volunteered to put it back together and set it up myself rather than having my guitar-builder friend do the whole thing...

Wrong....

DANG these things take a LOT of work to assemble and setup properly... I have about 9 hours in it now...

But what a sound... I just love it.

Anybody play 12-string?

I really admire the way you sit when you play the keyboard.

;o)

I have a Takamine Acoustic 12-string with the built-in piezo  
pickup... it's about 25 years old & still sounds & plays pretty  
good. I also have this beast (leaning up against the wall in  
the background of this pic)

What? you're supposed to SIT while playing the keyboard?

That's where I had just set it down after trying to play it while holding it against my neck like a violin.

Hey DC

I used to play an acoustic 12 string -solo gig. I did as much as I could to keep things interesting, and used the 12 on one or two songs per set. Of course the sound was real big compared to the 6. I used to love going into larger spaces and listening to the thing get all piano like. I ended up trading it as part of a deal to get a hand built six string. I've never played lead or soloed on a 12 string though, I'll bet thats a pretty interesting experience. I'm always amazed at folks that can solo on 'em and make all the notes ring with no unintentional damping. Of course on the acoustic fretting two strings instead of one was also good for toughening up fingertips :-)

MR

Well, I think that if you are sitting, you should definitely keep the keys pointed away from you.

;o)

Acoustic 12 is even harder to play than electric 12. I have played lead on mine, but you don't want to bend notes as the 2 strings do not stay at the same pitch as you bend them. You can get a pretty heavy sound out of them though.

Now you need another one!

We've got a beautiful old rosewood Larrivee jumbo 12 here. Sounds like a friggin' piano. I'm getting ready to start lifting weights so I can get in shape to play it.

I love that size of an acoustic. Records so nice.

What it it?

I love it. BTW, take a look at how straight the neck is. If it needs a bit more truss rod, it could get easier to play.

indeed.

I can tell you a little story about the guy who built the John McLaughlin guitar - that particular one in the shot wasn't built by him, it was built by me and a couple other guys when I was working for Mighty Mite Guitars back when they were a real custom guitar company & not just a parts jobber. That's a true one-off custom job in the pic... after it was built I bandsawed the templates into several pieces.

In any event, the guy who built McLaughlin's guitar was a guy named Rex Bogue - Randy Zacuto, the guy who founded Mighty Mite, had been pals with Rex for some time, and Rex was mainly an electronics guy & also a true artisan with inlays & such, who had gotten into luthiery as a result of him doing inlay work on other people's guitars. I met Rex a handful of times when he would come by to meet with Randy over one thing or another - Rex had designed a guitar preamp we sold called the S-80 - it was a pretty damn good guitar or bass preamp... simple - a sealed box about the size of a matchbox that you'd wire into your guitar cavity - boosted the output & made the tone control have a broader range. Anyway, Randy had one of Rex's guitars that he used to keep around the office... super-beautiful, super-heavy (Made of a Shedua body with a mahogany neck & ebony fretboard), made the heaviest Les Paul seem light, but this thing was gorgeous, with a tree-of-life abalone inlay on the fretboard, three-rings of abalone binding around the body AND up the sides of the neck/fretboard & all around the headstock face & edges, too. This was a singleneck six-stringer, and it was shaped almost identically to the Yamaha G-2000 that came out later.

The thing I remember most about this guitar though was the way it played... I have NEVER before or since put my hands on a guitar that played so well & so effortlessly... every movement was like gliding across a newly & perfectly frozen pond on freshly-sharpened ice skates before anyone else had managed to get there.

I heard Rex had some playability issues on a few of his instruments, including the McLaughlin doubleneck - which I understand had to be built twice, actually; but he sure nailed this one.

I wish I knew where that guitar was/is today.

Neil

Not if you have a Fender Shenandoah!!! lol

Acoustic Body with a neck block for a bolt-on electric 12-string Jazzmaster/Coronado neck! I had a Silverburst version of this for a couple of years. Played GREAT! Sounded like shit. lol

Cool story. Someone handed me one of the McLaughlin guitars once to try out... I could not believe how high the action was... Maybe it was the reject!

Really??? Wow, I didn't know that the reject ever existed after he built the 2nd one. I do know the one that McLaughlin had for quite some time famously suffered a fatal headstock injury when it fell over onto the floor on one occasion - it was repaired, but McLaughlin reported in interviews that it never played the same again... I wonder if the one you played WAS "the one" (after it had been repaired)?

You are soooo old Don. ;o) I remember them too. Used to play one onstage. I'll never forget listening to Dean Parks playing jazz on one of those things back in the late 60's at a party where our band was swapping sets with his.

Speaking of Shenandoahs, I've attached a pic to another one of my babies. It was one of my live giggin guitars back in the 90's but it records well.

Ever seen one? It's a Martin Shenandoah C20. Has a very nice feel and tone to it. They were assembled in Nazareth from parts made in Japan, and were finished in Nazareth as well. The "assembly" did not consist of much more than attaching the neck to the body, however, and because of that and the Japanese origin, Martin was forced to stop using the "Made in USA" stamp on the inside. Mine's an early one and says Made in USA. The finish was high quality, and the expense of it on these lower cost guitars was one of the reasons Martin dropped the line.

Just another piece of the puzzle around here.

;o)

I don't know, but if it was, and he played that music on that guitar then he is certainly an alien...

I found it almost unplayable. Maybe that's why it was gathering dust...

DJ

Now I have guitar and rack envy!!!

Try to post pic of my classic tomorrow

Dean is a great player. Sounds like a pretty good party.

>Speaking of Shenandoahs, I've attached a pic to another one of my babies.

It

>was one of my live giggin guitars back in the 90's but it records well.

Cool. I bought a Taylor 410 dreadnaught that I like, but it is boomy  
when recorded. I want one of these...

[http://www.breedloveguitars.com/instruments/guitars/master\\_class/cm\\_classic/index.html](http://www.breedloveguitars.com/instruments/guitars/master_class/cm_classic/index.html)

A heard a lot of good stuff about those, but have not played one.

I had a lovely pair of KM84's that I just didn't use very often, so I sold them and bought this, which I play all the time:

Haven't seen one of that particular Breedlove until now, but they are great guitars. Aaron and I stumbled into a place on Broadway in Denver last weekend called GuitarX and it had a whole wall full of Breedloves.

No kidding

(wiping the drool off the keyboard)

I've been thinking about springing for a nice 6-string. I recently played a Dana Bourgeois at a gtr shop - very sweet. Has anyone had experience with one of these?

The Breedlove factory is about 3 hours away - maybe I should check that out.

Yes. I have written 4 new tunes on it. I am using open G tuning so far and about half of the tunes use slide. My friend the banjo and guitar genius keeps trying to show me how to play it properly, but I figger, the world does not need another mediocrity wishing he were Jerry Douglas or Doug McCleod, so I write this almost prog classical sort of stuff on the National and it comes out sounding like old Appalachian stuff anyway. Works for me... You had a friend out there you sent me to for a good price, but it would have been a 4 month wait. There was a guy here in El Lay that had one waiting for me and a good price too. I really liked the folks at that music store you sent me too. Much nicer than most of the shops out here.
