...and a great string library for it? I have a friend who turned up raving about the Garritan string library for Gigastudio but it only seems to work on PC.

Any ideas?

Thanks!

For strings on OSX I currently use Garritan Personal Orchestra, the Native Instruments Kontakt sampler, the EXS sampler in Logic (and my acoustic violin and viola :^)

Both EXS and Kontakt claim to load Giga stuff, not sure if it works in all cases. You might ask Garritan, they would know if their giga version would translate.

Cheers,
-Jamie

Does the Garritan Personal Orchestra run as a virtual instrument by itself?

By the way - Actually playing violin and viola is cheating!

Yep, it comes with a Native Instruments player app that runs as AU in Logic and elsewhere. The player will run several of Garritan's instrument collections.

For all things Garritan, go here:
