Can someone please give me a step by step walk thru of creating Submixes with 1 eds card. I have struggled with this and can't seem to figure it out. Thanks in advance
Al

Do you have the Paris manual? It should be there. It's been a while since I've done one, but I don't remember it being difficult.

What step are you having problems with? No idea where to start? Give us some hints.

Hi Al,

You can make a new submix in the master mixer window. It's the first option under the SubMix menu.

I hope this helps!

I've attached the manual for PARIS 3 if anyone needs it.

All the best,

Mike

Thank you Mike. I've been consolidating my PARIS files and couldn't find a copy of this.
