Hi all

Is there a function in Cubase/Nuendo or aftermarket application similar to Beat Detective in PT ?

Thanks

DOn

Hmmm... there is a Audio Quantizer which ROCKS ... but I don't think there is a beat detective. It has a temp calculator but you have to tap the space bar.

It's called Melodyne! ;-)

There is a way to do this within Cub/Nu... but it is clunky by comparison. One could, in theory, put a Melodyne plug on each drum track but it would take a while as you would have to play each track in one at a time. I tried three vocal tracks at once, but it crashed Nuendo. :-\

David.

I do this all the time but I use the Audio Quantize in Cubase 4. It's a LOT Faster than using Melodyne. Melodyne ROCKS for melody tuning.

The Audio Quantizer can make things sound TO perfect haha. So what I usually do is Audio Quantize my Kick and Snare track but leave the rest untouched. That way the hat/ride etc keep the "human" feel but you have a solid foundation with the kick/snare.

Quite possibly, but it would be an interesting experiment. Obviously, Melodyne studio would be best suited for this task..

David.

You would screw up the phase relationship between tracks.

There is no function, but there is a way to do it. I found the attached tip on the Nashville forum about a year ago which explains it in detail. I tried it and it does indeed work...
