i installed a new mobo in the paris comp and now i'm getting Error 40/32
when it starts, then quits.

any ideas?

jef

sorry that's 40/28. I just took out the adat card...that wasn't it.

could be the new eds card?....I installed the software with an older eds
installed, then got a "hardware not connected" failure so I swapped it
out for a newer one i had kickin' around, which is when I got the message.

Glad to see you're alive and kickin Jef

Now where the fuck are my sex tapes...oops I mean sax tracks

;-)

heeehehehehehehe
