]I connect one 8 Channel Outputcard to second slot of Paris MEC. In which way should it appears in patchbay window ?
I can`t find it there !?

I have an 8 channel Inputcard too. Maybe is it automatically in this Input Interface MEC Modules A connected ? Or Maybe if second slot(B) trouves a card it appears at patchbay window as MEC Modules-B ?

Actually Screenshot of my patch where at first Slot installed 8 Channel Input Card and second slot installed 8 Channel Output card:

The Backside of my MEC Module :

Sorry for bad English hope you can understand and help me.
THX !

Hi Dan,

See the MEC-Modules A 16/16. 8 of those are you input and 8 are your outputs.

Drag that module into the patch bay. Double click it. It will open up the module and you'll see both.

Wayne

Hi Thx for fast reponse !
I did see the card now !

Can you tell me in wich way connecting and routing a Hardwarecompressor with both cards. I got
a Setup of Microphonepreamp Universal Audio 4-710D. As Compressor I use a 1176 AE from UA.

The 4-710D goes into Toslink/adat by RME Soundcard into Paris 442 Module SPDIF.
I don't know the right routing into Paris Patchbay to use this Hardwarecompressor after Record.
I´d like to record clean sound and after record i like for example to compress or something like
that with hardware.

I haven't done any patching out to hardware loops so I'm no help here.

Ok.

I haven't fix this problem these days. Cause I built a new Studio, with my good old Paris.

After renew my Vintagestudio i will try it again !
