still got some tweaking to do I've discovered. There's some harsh digital
clipping coming from somewhere, the GNX I guess, which I've got to work out,

and two keyboards and the guitar are way louder than the other to the point you can't hear the quiet one... which may require that I reprogram the mix bays to turn all the others down on each patch. Or I could go option B and run that keyboard through the mic pre for extra level, which may be easier, and may yeild a better result as it will allow me to run hotter overall through the system, hence less noise.

These things and more will be sorted out as time goes on, but overall I'm stoked at the progress. :o)

Cheers,
Kim.

>Wicked cool Kim. Executing a gear plan, with no problems, is it's own special
kind of ecstasy. Are you a solo act or setting this up to work in a band?
I seem to recall you mentioning that you were in a band, but maybe trying
the solo thing.

>The boys at Radial do a fine job... we know them well. If shopping in
Canada isn't a problem for you, I highly recommend them. I would
contact Steve Hopia directly (604-942-1001) and tell him what you are
looking for. They are a Mogami shop.

David.

right by the ears. And the C16 is such a cool, sturdy piece.

I think it likely that the EQ in the 1820M is probably, as w.effects, much like Paris. I really appreciated the Paris EQ on a vocal track earlier tonight. If/when I sell Paris, it should fall to some total Parisian who needs spares!

Maybe for now I'll just hang onto a system that's got soul to it!
Mr. Tankersley, Aaron A., DeeJ, so many other core Parisites,
thanks for your wisdoms and contributions.
I can see adding new sytems, but keeping Paris at core.
