Hey, I may have an original RME 9652 (not HDSP) coming available, also.  
Know anyone that might be interested?

>Hi all,

I am looking to buy 2 EDS cards with crossover cables, 8-in, and 8-out cards. Contact me if you're interested in selling and lets negotiate a price.Hi -

All of my Paris stuff is now for sale on eBay, in one big lot. The auction ends Friday, is currently bidding at \$349, and there is no reserve. I've included the basic description below. For more info, follow the link and check out the auction.

Thanks in advance for looking,  
Bob

A whole heap o' Paris stuff. Some of the items are BRAND NEW "A stock", some of the items are factory refurbished, and all of the items were acquired at the factory during an employee-only sale. Most of the boxes were factory sealed until today, but there have been some curious shoppers, so now quite a few of the boxes have been opened to inspect contents. All of the items are unused by me. I had intended to put a large Paris system together, never did, and have since moved on to another platform. My loss, your gain.

The items:

- # 1 "Bundle 3" - consists of one each \* MEC chassis (with standard I/O) \* C-16 control surface \* EDS-1000x computer card. The color is BLACK.
  - # 2 more C-16 control surfaces, both BLACK
  - # 4 of the 442 I/O interfaces \* 2 are in boxes with cables \* 2 are unboxed
