Subject: Faderworks is just AMAZING !
Posted by Dimitrios on Thu, 01 Feb 2007 20:58:05 GMT

Hi,
 would like to note here that after working a coupkle of days with faderworks
I don't know how could I work (mix) before in Paris !
Amazing..
I have put 64 instances along 4 eds cards as a standard preset.
I group all the instruments accordingly, drums, perc, ac.guitars, el.guitars,
back. vocals, strings, pads, etc.
Now pushing solo on a faderworks instance on any audio track you here only
the group it belongs too, or mute !! the group.
I also use the latency compensator.
Putting an waves rvox I type 64 and all faderworks go up to 64.
Putting a rchannel from waves on snare it needs a 65 , so I type 65 and all
others go up just one sample to 65 !!
fantastic.
I encourage all that you bought it, USE IT.
You can ask me anything by the way if someone has some questions with it.
Regards,
Dimitrios

Is there a list of plugin latencies somewhere?

That's great Dimitrios.
Anyone know the math to convert to 48k from 44k?
Thanks,
Tom
  "Dimitrios" <musurgio@otenet.gr> wrote in message =
news:45c37759$1@linux...

 Here is the waves latency table.
 On my Paris rig Ultrapitch is 8192 latent !
 Regards,
 Dimitrios

 Native Latency Table
   Plug-In Latency Time [KHz]=20
 44.1 96=20
 measured in Samples=20
 C1 comp / gate 340 720=20
 C1 comp side ch 340 720=20
 C4   64   128=20
 L1   64   128=20
 L2   64 128=20
 L3   3528 7680=20
 LinEq BroadBand 2679 5360=20
 LinEq LowBand 2047 4095=20
 Lin Mb   3528 7680=20
 Morphoder 639 1279=20
 Rchannel 65 129=20
 Rcomp 64 128=20
 RdeEsser 64 128=20
 Rvox 64 128=20
 Sound Shifter 6946 13858=20
 Trans X   64 128=20
 Ultra Pitch 8239 not supported=20
 X-Click   2625 not supported=20
 X-Crackle 2625 not supported=20
 X-Noise   5120 5120=20

 44.1 96=20

 For TDM add 3 for each Plug-In except for the UltraPitch !!!

For HTDM add 1028 samples for each Plug-In.

Sweet! Thanks Dimitrios. Do you or anyone else happen to have them for the
EDS effects. Is there any latency other than lookahead values?

Nolimit as ALL eds plugins with no lookahead 2 samples.
Nolimit 0.001=50 samples
EDS/GATE 0.001=47 samples
0.002=93 samples
0.003=139 samples
0.004=184 samples
0.005=230 samples

Auxes also 2 samples
submxix 1 to submix 2 beetween 10-14 samples (mine has 12 samples)
Submixes thereafter are 2 samples.

Regards,
Dimitrios
