Heya folks - anyone got an old disk of CodeWarrior Pro 7 (as in "2002-ish") kicking around? Know someone who might? It might help solve a Paris mystery and enable Really Cool Things.

[EDITED TO ADD: We've just had an excellent success with CodeWarrior 8 - enough to verify that this is very likely the issue we're facing, and that the right version of CW is likely the cure - but we still aren't there yet. Anyone got any of these?

06/18/99: CodeWarrior Pro 5
09/09/00: CodeWarrior Pro 6
2001: CodeWarrior Pro 7]

 Hit me up, and thanks in advance!

- K

Hm, weird, I can find no trace of it after repeated searches. If you find a link and can post it here that'd be great, thanks!

Just noted that this page is an update. They might have the version on the site, I haven't looked around the site that much.

I've got access to CodeWarrior Development Tools v8 for Mac OS and Windows.

Let me know if that is of any use?

Heya Pete! I don't know if that's the same thing - what year does it say on the disk? The one I'm looking for dates to about 2001-2002.

So close! Unfortunately we tried 8 and it might be too new, so we're looking specifically for 5, 6 and 7 to test our hypothesis. Thanks for looking, and fingers crossed for all of us!
