Hi Mike. Give us your OS (windows or Mac? 98? XP?), basic system specs,
PARIS version, how far you've got, and then folks will have some idea
of where to start in giving you advice. "It doesn't work" doesn't give
us much info to help you with.

Meanwhile, here are some resources:

The Wiki (still new and growing):

Manuals:

Introduction manual

Reference manual

Thanks John, much more complete. It's sure time to get all of the
verified working links in one central place again.
