I want to get some cool lights for my music room, things like black lights,
color lights etc to set mood for a dark room. Where can I get some cool
unique lights that are not spendy that would put the whooaahh into my room?

Hey John,

Just be careful to stay away from anything requiring a ballast or rheostats,
as they can induce an amazing amount of noise into your environment.

Hope this helps!

Mark

lava lamp technology seems to be iffy, some just have blobs that don't move,
i need a great lava lamp with temperature control so it keeps bubbling

OOOH Yeah! some Ratshack or Heathkit color organs.... THAT'll do
the trick! lol

How about some track lighting with various colors to strike the
mood? Set 3 or 4 different tracks, each with differet colored
lights? Fuck the dimmers (since you really do need some hi-end
dimmers to avoid getting BUZZZ in the signal chain), and just
go with some switched color tracks?

Neil

Ain't that the truth? I've got two of them that pretty much just sit
there....

pab

It's that damn, cheap, Chinese lava... no quality control!

lol

Yeah! the guy down the street sells the REAL NOS lava...

ONLY 300.00 per lamp. Ahhh, the price of tone.
