Subject: Paris 3.0 on XP Strange Startup

View Forum Message <> Reply to Message

Hello All!

Have been running Paris 3.0 on Xp for more than a year now, with not much problems.

I just decided to send this now to have your view on this.

When i startup the Paris Application, the Splash screen appears, and the communication to the MEC starts.

For me a "normal" startup will show the Internal reference light up, then the sample rate, then Master Clip and then Abit24 Clip.

But sometimes, maybe once on 5 attemps, there will be no communication with the MEC.

The light up sequence will not occur. then if i check in my Patchbay window, there are some components missing.

I close up the App and start it up immediatly and it is then ok...

Has it happened to anyone,, any ideas? any driver update?

See the provided Attached images just in case

thank you!

NJ
