Tech was here this morning. We should be all good.

Speed seems much better. Hopefully we'll be sailing smooth from here.

Cheers,
Kim.

I hate to tell you this Kim, but, today the NG is running slow and sluggish on my end. I'm using the web, pages half load in about ten seconds and about thirty seconds later the rest of the page loads. It could just be me???

How's it running for the rest of you?

Ah. That might actually be me. ;-) It's only been fixed since the time on that post, and since then I have downloaded a few things which were on the list to download once things worked, so I imagine it's just me and the fact that I haven't set up QOS on the router yet hence it doesn't know that you guys should get at least a reasonable portion of the bandwidth when required.

But from what I'm seeing here it's running pretty well. :o)

Cheers,
Kim.

Yep. The line under the house was dodgy about 10 feet from the point. He said the line looks extremely clean now though, so now that it's fixed we should be running well. :o)

Cheers,
Kim.

Good to hear, Kim.

Now, we just need to get your PARIS PC working properly.

All the best,

Mike

Tomorrow I will strip the PCI bus of all but one EDS card. I reckon that's a chance...

Cheers,
Kim
