Hi guys

One of the things our new studio will be doing will be internet radio broadcasts and I am thinking of doing a show on the music business.

So I'm looking for people in the business at all levels as well as people in certain regions of the world like Asia, Africa, Europe etc that would be interested in being interviewed or participate in a round table discussion.

Most interviews and discussions will be recorded via skype and with minimal editing broadcast on the internet as part of this series on the music biz.

Anyone interested please contact me via dnafe@rogers.com or skype me at dnafe23

Don't be shy
