Subject: EDS500 card for tracking only?

---

I have a chance at picking up an EDS500 card.

Since my mobile rig is only used for tracking, and all mixing is done at home, would I be OK replacing one of my two EDS1000 cards with the 500, thereby releasing one of the 1000's for the home mixing rig?

My thinking is that the tracking rig won't use any efx anyway.

Thanks.
