Hello everyone.

I am (sigh) selling my beloved PARIS rig. It has served me well but I play-out more than record-in these days and need the cash.

It is a complete bundle 2 including...

Original Black C16 control surface.

EDS1000 card

442 interface

cables to connect all.

Not a scratch on any of it. The c16 lived under a towel in a smoke-free home studio when not in use. The 442 was racked and never moved for 12 years. EDS card has been in 3 different computers and still works like new.

I would really like to sell this all at once as a package but will entertain parting it out. Make me an offer and we can work it out. This is all in really fine shape and would make a fine addition for a portable recording rig because of the size of the interface.

Actual shipping to be paid in addition to the sale price by the buyer.

What are you asking for the bundle? I am looking at a couple C16s in Canada. I just bought an almost new EDS card that was only used to download a couple projects for \$100 and C16s are going for \$40-45. But, I haven't gotten a price on an Interface, which I don't need. But, would buy for the parts.

If you don't mind, please give me a ring.

Thanks.
