Subject: Virtuavia chasis + macbook pro running XP + firewire for 2nd HD for Paris?
Posted by rokuez on Thu, 25 Feb 2010 09:57:00 GMT

I have a macbook pro that can run windows xp sp2

if i get this

 http://www.virtuavia.eu/shop/expresscard-34-to-pci-expansion -box-p29858.html

and 4 eds 1000 cards

Could i run paris on my macbook pro if it booted up xp ?

then i could hook up an external HD to the firewire of the macbook pro for my external HD

if u see any flaws with my plan let me know please!!!

Also let me know if thats the correct viruavia chasis!
