Content-Transfer-Encoding: quoted-printable

So what is the cheapest way to get into one of these in plugins?

I see Bombfactory gives theres away free now for PT users.

I suppose that is because the UAD-1 kicks the Sh\*t out of it???????

Is there any others?

All I want is the 1176.

Is there a TDM to VST converter ro RTAS to VST?

--=20

Thanks,

Brandon
