Subject: ADAT card suggestions?

I'm thinking of adding a PCIe ADAT card to my system so I can run Reaper in sync with paris. Ideally I'd like this in a PCIe form factor.

What should I be looking for? I assume that ADAT 9 pin sync will be required in order to have Reaper respond to Paris as a slave. Or, is MTC good enough? I don't mind paying more for peace of mind....

RME cards look nice, but are pricey. Is there anything else to consider?

Cheers

Kris
