Hi All.

Just wondering if anyone here has successfully run three Mecs without an external word clock? What are the downsides of not using one? I have three EDS's and would like to connect an extra 16 inputs to the third EDS. Is it as simple as just daisy-chaining the three mecs with two BNC cables?

Cheers.

Kim

I tried it some years ago... couldn't get it to work without an external clock...

I tried it too, no chance without extern wordclock !

All the Best

Dan
