Picked up an Audient asp880. Expected a little more out of it but it is nice. Still prefer the sound of my presonus mp20/apogee rosetta chain. Also grabbed a TC Finalizer Express. I am in love with this thing! My wife was even impressed with it when we did a little a/b test with it. Ebay. Very addicting!

That's really cool - I loved that Presonus MP20. Really good sounding preamp.

Interesting about the TC Finalizer. What specs does it have?

Ted

Its just the Express version. Kind of a pre-set/tweek sort of deal. Unlike the older "Wizard series" this one is 24 bits on ALL digital ins/outs. I use the s/pdif. I'm REALLY digging the multi band compression. I was SO impressed at how quickly it glued my tracks together. PLUS, I got it on ebay for under \$250! Very happy! It also has adat i/o and the d/a conversion sounds good. Got it all clocked up to the old Rosetta, although it doesn't have word clock, but it will clock to s/pdif OR adat. It also offers 20&16 bit dither. Anyhow. Very happy. Especially for the price tag.
