Hey all you Logic guys!

I need to know how many physical inputs from ProTools HD hardware that the previous version of Logic will access at one time... we have a rental for a live recording and the client would like to use his copy of Logic to front the HD hardware. I need to access all 48 analog 192I/O inputs at one time. Is this doable?

Thanks,

David.

So are you saying it shouldn't be possible but to go ahead and set up the tracks anywayor what?

;o)

shouldn't be as in a problem to do. in other words no problem just set up (create) enough tracks...you can always make more....one or many at a time.
