Subject: Paris & XP
Posted by Ron Imhoff on Tue, 08 May 2007 21:14:36 GMT

I've been running an ensoniq Paris system under win 98 with a C-16, and IF/2, and a 442. Bunch of other stuff piled on the front end (i.e. POD Line 6, Alesis Quadraverb, etc).

I'd like to run the system under XP.

Does anyone know if this can be done, or is/is not easy to do ?

Thanks
