I assume you mean the Skunkworks pack that Chuck made available? Doug Wellington's PARIS
FAQs site's links give 404s, but they're accessible if you know where to look. Try here.

 I have gone to the Paris FAQ and all the links os9 specific are invalid and the link you posted for
me to "try here" is a users manual for adat. I just want to find more sofware effects I can use than
what come with the Paris. I see there is an autotune for PC and some EQ packs but the poor mac
OS9 user gets hosed LOL

Oops! My apologies, that was posted in haste. This link should work.
