of an EDS card. You can  
get more details here:  
<http://www.infinitevortex.com/creamware/scope-cards/project/>

\* MOTU Symphonic Instrument. VSTi, sounds nice & clean, well-  
recorded samples it seems - it's just not my cup o' tea. Has a  
built-in convo reverb! License is via iLok (included). \$200.  
Info link & demo clips here:  
<http://www.motu.com/products/software/msi>

Paris gear-wise, I would consider a trade or partial trade for  
an 8-in module and/or an ADAT card.

Other-gear-wise, I could use a superclean/superfast preamp like  
a Massenburg, or something of that ilk. Could use something  
interesting in the way of compressors.

Depending on what you were trading to m

e, and for which of my  
stuff we were trading for, I'm open to working the cash portion  
(if any is needed) in either direction.

>ChrisDeej,

Do you still have the IF-2 and the C-16?

I'm seriously considering splitting my existing Paris system with a mate of mine who has built himself a studio. I'm not sure what bits and pieces I'll need or he'll need at this stage, but an IF-2 might be handy for a couple of extra inputs for one or both of us, and I only have one C-16 so that may also be handy.

I'm just thinking out loud at this point, but thought I'd drop you a line to see if you still have them.

Cheers,  
Kim.

section.

I thought it would be a crucial part of my rig... and I haven't used it since. I think I've reached the gear "tipping point", and I'd rather just play my horn by itself.

It is a remarkable unit for pitch correction, harmony, and vocal effects. Floor pedal ruggedness. But heck, you already know that.

I paid over \$700; yours for \$500, free US shipping.

Thanks,

ChrisOOPS- forgot:
