Subject: WEIRD Auto-Tune problem!

Went to boot Paris up today and got a message saying that my computer's clock setting was inconsistent with the date of my version of Auto-Tune. Since I'm a Mac dude (a situation that has been gradually changing but not quite yet for my Paris system) I am stuck in OS 9.2.2 which means that I'm stuck with version 3.02 of Auto-Tune. So I set my computer's date back to 3/3/2010 and presto! Auto-Tune works again. Which would be great except that it totally screws up finding files by date in the folders because it dates them all as last year. Am I the first fortunate guy to experience this?
