Hey guys (and gals)... I have setup my new firewire studio and I been tracking in Cubase LE that came with the program. Although the sonics seems ok and maybe it's just because I am new to Cubase... but is there something better out there for tracking that resembles Paris? I have dual monitors and there is no way to make use of this in Cubase... It creates a new version of the track each time.. but unlike Paris, if I delete, I mean delete... don't make me close the program so I have to clean up all those monster files... hopefully someone understands what I mean here... And the plugins that came with Cubase are... ummm... can you spell TERRIBLE! I tried to adjust the ones that I played with and I must say... WHAT were they thinking! They need lessons with plugins from Paris. An example is the chorus... I apply that to a track and sheesh... why waste my time. I max'd the thing out... not much of a difference. Is there plugins that go from mono to stereo, like in Paris.. or is that just a Paris plugin thingy?

I like the fact that Cubase LE is free with my device... but I am hopeful that there is something else out there that operates similar to Paris... Anyone?
