[View Forum Message](#) <> [Reply to Message](#)

THANKS GUYS,

I'm up and running. Don suggested doing a clean install of Paris and that did the trick. I have installed all of my EDS plug-ins and my original VST, I guess I want be installing any new VST for awhile that was sort of scary.

Terry,

I feel cleansed after an experience like yours.

I'm glad you made it back so quickly!

Tom

Excellent!

Set up a dedicated VST folder in Paris and you should be good to go

Maybe Dimitrios can chime in here because it was his idea if I remember =
correctly=20

I haven't used the Paris VST path for years. I am using "Chainer" to find Steinbergs VST path, where I have my VSTplugins and "VST-DX Adapter 3" to find "Chainer". Then you can open Chainer as a DXplugin in "Native Inserts" in Paris and use VSTplugins in "Chainer". You can have up to 9 VST plugs in one "Chainer" on a single or stereo channel in Paris and up to 4 "Chainer" in "Native Inserts", if you don't use any DXplugins. So theoretical you can use 36 VSTplugins in a Paris channel (576 VSTplugins in a single Paris system), if there had been enough PC "horsepower";-)

Terry, speaking from experience, this would be a good time to ghost your OS drive now that all the worms are back in the can.

just make a drive image and then you can try every vst under the sun and be back in 5 minutes when you hit a mean one.

Hi Guys,

This is Terry's wife. He's out of town and unable to access a computer so he asked me to check his mail and post a response. He appreciates all of the help. Demetrios he'll be checking your post about "Chainer". Also, he says that he did make a separate VST plugin folder. Thanks again to all.
