---

A year and a half ago, I had posted this.

was communicating with a couple guys, and then an avalanche of family and other personal events happened, and this went beyond the 'back burner'.

First, apologies to those I dropped communication with.

Here is what I posted.

Hi,

I am looking to unload all my Paris equipment.

I have

3 EDS-1000 cards.

1 Black MEC w

1 Output card

1 ADAT card

1 SMPTE card. I got a deal on it, was hoping they would complete functionality on it. I remember some using it on a limited basis)

1 Blue MEC- never used.

1 Black C16, 1 Blue C 16

(these work, but sometimes some buttons were finicky.

I never attempted to clean them, or apply any fixes, just worked with them.

All the connecting cables.

If I look hard enough I probably have at least one of those 2 input connectors that could plug into a card or the back of an MEC.

I would like to unload everything. And not locked into any particular price, long as it's reasonable, and shipping would have to be worked out.

Regards,

Jeff
