I got lucky enough to have a 6 piece reggae band record all day yesterday and I have to say the sound and workflow in cubase was more than I could have imagined. It was fantastic. The band is blown away with the sound and possibilities. We are going to do vocal overdubs next week but I have to say the sound was even better than Paris ever was. 32 bit mixing is so sweet and forgiving and these digimax fs with rme 9652 are so fine.

I had only one glitch where I deleted an entire song because of my poor understanding of how templates work but we did 11 songs and these are great friends so I'm not in the doghouse.

Other than my own errors, I didn't have a single hiccup with cubase 4 the whole time at 3ms latency. Rock on !
