Hi,
I am looking to unload all my Paris equipment.
I have
3 EDS-1000 cards.
1 Black MEC w
1 Output card
1 ADAT card
1 SMPTE card. I got a deal on it, was hoping they would complete functionality on it. I remember
some using it on a limited basis)
1 Blue MEC- never used.
1 Black C16, 1 Blue C 16
(these work, but sometimes some buttons were finicky.
I never attempted to clean them, or apply any fixes, just worked with them.
All the connecting cables.
If I look hard enough I probably have at least one of those 2 input connectors that could plug into
a card or the back of an MEC.

I would like to unload everything. And not locked into any particular price, long as it's reasonable,
and shipping would have to be worked out.

Please contact me through this page if anyone is interested,
There's nothing like backup parts, even if there's no room to integrate any of this into your system.

Thanks,
Jeff

Hi Jeff,

I tried to message you, but was unable to (system said you were not accepting PMs). I'm
interested in the 8-out card, & possibly an EDS-1000 as well; could you email me back at
dashmac@aapt.net.au if it's still available?

Cheers.

Opps; sorry mate, I just re-read the ad & realized you wanted to sell it all as a bundle.

Not to worry; I might give it a miss - would hate to think what shipping costs to Australia on that lot would be!!

Hi Kerry, neglected to allow PM's I would like to unload it all, but am willing to do a ridiculously low price to do it. I have no clue what shipping would be, so am curious about that. In the meantime, I tried allowing PM, but need to enter password, and lo and behold, once again, I can't find the email from this last time I needed to reset it. But anyways, I'm not locked into any price...

Jeff

Would you take \$500 for the whole thing? I'm not really sure how to price the EDS-1000s since they rarely are up for sale.

Aah yes! Finally got the password thing resolved, and can now receive PMs, so anyone interested can contact me that way, or via email.

Thanks,
Jeff
