Hello, hello.....any ideas about a couple of error messages; we know 7/7 is IRQ conflict, even though device mgr says "no conflict" Paris wants 11, so does video card, so does IRQ holder...2 times !! Trouble is, can't change IRQ number, not allowed in OS (98SE) How to change it in BIOS...I'm not in there much !

Also, anybody know error 40/48....finally, why would anybody buy up a program as sweet as Paris, put it on the shelf, and leave us with ProFools, Cubes, etc. etc....

just cranky tonight, I'll be better tomorrow.....pieces, Ced
