How does one sync Paris to a hardware sequencer? Is it reliable?

I know there was a reference to sync in the old blogspot wiki but that is now down.

Bump

Any ideas?

Hi.
The only reliable way I have found is to slave my second computer running Cubase via ADAT sync. I have an ADAT card in one of my mecs, and an RME multiface with ADAT sync in hooked up to the Cubase comp. That probably doesn't help you, but I'm interested in what others have to say.
Cheers,
Kim.

I've got a couple of things up on the PARISWiki -

<http://wiki.paris.kerrygalloway.com/wikka.php?wakka=ParisSyn> c

Will you be slaving your hardware sequencer to PARIS? What is it and what sort of sync can it read?

I'm crossing this bridge now myself. Any chance that PARISWiki could be restored or could you post those MIDI things here?

Edit: Found the wiki on the wayback machine. Lots of great info - thanks!
