Hi,

I am glad there are 5-6 Paris users willing to test and work along with senderella and Paris and as a matter of fact with making Paris a better daw...

I wish though that all you Paris users and posters here would jump on because this would make things better for all of us...

So Senderella really works great !

FIRST OF ALL you have to put a line in your Paris cfg :

EDSTransfer=8,8

Then...

1) If you work 16bit file you need a 16bit empty track , you can make this just by recording nothing for say 6 minutes and then name it 16bit_emptyfile.

If you work 24 bit then you need a 24 bit empty file.

NOTE that you must send 16bit files over to an empty 16bit file and 24bit to an empty 24bits.

OK you may ask what is this empty thing needed ?

Well this is for SUMMING the senderella sends ,this means that wherever you put the senderella as a RETURN (SUMMING AUX) there you have to put an empty file.

2)Senderella has a redirect option which means you can either let the sending track to continue sounding on main mix OR muting it by redirecting, so that it only goes to senderella return.

3) You can have 64 auxes !

4) This is submix crossable.

Means you can have a DX reverb as aux for all your eds cards !!

You just need to open the return senderella (on a 4 card Paris system) on track 64 (for stereo scroll down) and then by sending senderella from any remaining 64 Paris tracks to the track 64 the DX put on native slot on this track will become your DX reverb return.

5) Now for stereo.

There are two ways of doing it with one having a risk crash Paris DUE to Paris bug...

This is that we know that you don't put on adjusted tracks mono native effects and stereo at the same time.

I have NOT tested this bug I managed to make it work but anyway I am pointing this out.

The second and most reliable method is by using the chainer plugin as your vst host for senderella.

On the above methods you can use THE FREE effectschainer which works just

fine.

On stereo though Chainer is a truly amazing thing.

It can have ten pages of vst plugins with dry wet AND panpot !!

So by using two senderella auxes (1 and 2) you just open a stereo instance of Chainer say on tracks 31 and 32 (two eds card system) and then on page 1 of chainer open senderella aux 1 turning panpot all to the left and on page two senderella aux 2 turning panpot all to the right.

So now by just opening senderella 1 and 2 on any audio track (you should have both open to have stereo) you can by turning the volume on aux1 send to the left of your native aux effect and bu turning the aux2 (senderella channel 2) sending to the right of the native aux effect return.

This way you can send it anywhere on a stereo panorama !!

This does not sound peculiar strange or difficult , it is just as if you use two mono aux sends on any console although you make some extra moves here...

As you understand you don't need to buy anything to have your Paris DX auxes. Senderella is free as Effectschainer is free too.

But if you want true stereo without risking any Paris bug thing I recommend the chainer (have I done this before ??)

I will try to find some other free way to have stereo aux using only free plugins.

One method coming to mind is by using two mono DX effects on stereo senderella return , for instance a DX reverb, opening the same reverb on track 31 and same on track 32.

Now by just panpot controlling the paris audio tracks (full left 31 and full right 32) you can have a quick stereo senderella aux system with free plugz !

I will need your input here with you trying it too because I feel bored being alone on this ride !

Regards,
Dimitrios

Dimitrios,

This all sounds remarkably familiar to something you (and I) tried a few years ago.

I remember three problems with my setup that you helped me with. Let's reminisce:

1) I was having trouble with saving and calling up presets in chainer of most effects. Maybe it was a=20 different chainer than you're using now? You helped me but it seemed difficult at the time.

2) Does Senderella also work with VST or is it DX only?

3) My system eventually broke down so I gave up. It was really zonked. I had to go back

to the tried and true methods with another C drive. I didn't have enough time to fight it. =20

I gave up but your concept was/is great!

=20

Maybe another try with two solid C drives is in store for me. I watch with all expectations of

trying this asap. Please keep up your remarkable work! I will join in when I can.

Tom

Hi,

I am glad there are 5-6 Paris users willing to test and work along with senderella

and Paris and as a matter of fact with making Paris a better daw...

I wish though that all you Paris users and posters here would jump on because

this would make things better for all of us...

So Senderella really works great !

FIRST OF ALL you have to put a line in your Paris cfg :

EDSTransfer=3D8,8

Then...

1) If you work 16bit file you need a 16bit empty track , you can make this

just by recording nothing for say 6 minutes and then name it = 16bit_emptyfile.

If you work 24 bit then you need a 24 bit empty file.

NOTE that you must send 16bit files over to an empty 16bit file and =
24bit
to an empty 24bits.
OK you may ask what is this empty thing needed ?
Well this is for SUMMING the senderella sends ,this means that =
wherever you
put the senderella as a RETURN (SUMMING AUX) there you have to put an =
empty
file.

2) Senderella has a redirect option which means you can either let the =
sending
track to continue sounding on main mix OR muting it by redirecting, so =
that
it only goes to senderella return.

3) You can have 64 auxes !

4) This is submix crossable.
Means you can have a DX reverb as aux for all your eds cards !!
You just need to open the return senderella (on a 4 card Paris system) =
on
track 64 (for stereo scroll down) and then by sending senderella from =
any
remaining 64 Paris tracks to the track 64 the DX put on native slot on =
this
track will become your DX reverb return.

5) Now for stereo.
There are two ways of doing it with one having a risk crash Paris DUE =
to
Paris bug...
This is that we know that you don't put on adjusted tracks mono native =
effects
and stereo at the same time.
I have NOT tested this bug I managed to make it work but anyway I am =
pointing
this out.
The second and most reliable method is by using the chainer plugin as =
your
vst host for senderella.
On the above methods you can use THE FREE effectschainer which works =
just
fine.
On stereo though Chainer is a truly amazing thing.
It can have ten pages of vst plugins with dry wet AND panpot !!
So by using two senderella auxes (1 and 2) you just open a stereo =
instance

of Chainer say on tracks 31 and 32 (two eds card system) and then on =
page

1 of chainer open senderella aux 1 turning panpot all to the left and =
on

page two senderella aux 2 turning panpot all to the right.

So now by just opening senderella 1 and 2 on any audio track (you =
should

have both open to have stereo) you can by turning the volume on aux1 =
send

to the left of your native aux effect and bu turning the aux2 =
(senderella

channel 2) sending to the right of the native aux effect return.

This way you can send it anywhere on a stereo panorama !!

This does not sound peculiar strange or difficult , it is just as if =
you

use two mono aux sends on any console although you make some extra =
moves

here...

As you understand you don't need to buy anything to have your Paris DX =
auxes.

Senderella is free as Effectschainer is free too.

Hi,<=
BR>I am=20
glad there are 5-6 Paris users willing to test and work along with=20
senderella
and Paris and as a matter of fact with making Paris a =
better=20
daw...
I wish though that all yiou Paris users and posters here =
would jump=20
on because
this would make things better for all of us...

So =

Senderella really works great !

FIRST OF ALL you have to put a =
line in=20
your Paris cfg :
EDSTransfer=3D8,8
Then...
1) If you work =
16bit file=20
you need a 16bit empty track , you can make this
just by recording =
nothing=20
for say 6 minutes and then name it 16bit_emptyfile.
If you work 24 =
bit then=20
you need a 24 bit empty file.
NOTE that you must send 16bit files =
over to=20
an empty 16bit file and 24bit
to an empty 24bits.
OK you may ask =
what is=20
this empty thing needed ?
Well this is for SUMMING the senderella =
sends=20
,this means that wherever you
put the senderella as a RETURN =
(SUMMING AUX)=20
there you have to put an empty
file.

2)Senderella has a =

redirect=20

option which means you can either let the sending
track to continue =

sounding on main mix OR muting it by redirecting, so that
it only =
goes to=20

senderella return.

3) You can have 64 auxes !

4) This is =
submix=20

crossable.
Means you can have a DX reverb as aux for all your eds =
cards=20

!!
You just need to open the return senderella (on a 4 card Paris =
system)=20

on
track 64 (for stereo scroll down) and then by sending senderella =
from=20

any
remaining 64 Paris tracks to the track 64 the DX put on native =
slot on=20

this
track will become your DX reverb return.

5) Now for=20
stereo.
There are two ways of doing it with one having a risk crash =
Paris=20

DUE to
Paris bug...
This is that we know that you don't put on =
adjusted=20

tracks mono native effects
and stereo at the same time.
I have =
NOT=20

tested this bug I managed to make it work but anyway I am =
pointing
this=20

out.
The second and most reliable method is by using the chainer =
plugin as=20

your
vst host for senderella.
On the above methods you can use =
THE FREE=20

effectschainer which works just
fine.
On stereo though Chainer =
is a=20

truly amazing thing.
It can have ten pages of vst plugins with dry =
wet AND=20

panpot !!
So by using two senderella auxes (1 and 2) you just open =
a stereo=20

instance
of Chainer say on tracks 31 and 32 (two eds card system) =
and then=20

on page
1 of chainer open senderella aux 1 turning panpot all to =
the left=20

and on
page two senderella aux 2 turning panpot all to the =
right.
So now=20

by just opening senderella 1 and 2 on any audio track (you =
should
have=20

both open to have stereo) you can by turning the volume on aux1 =
send
to the=20

left of your native aux effect and by turning the aux2 =
(senderella
channel=20

2) sending to the right of the native aux effect return.
This way =
you can=20

send it anywhere on a stereo panorama !!

This does not sound =
peculiar=20
strange or difficult , it is just as if you
use two mono aux sends =
on any=20
console although you make some extra moves
here...

As you =
understand=20
you don't need to buy anything to have your Paris DX =
auxes.
Senderella is=20
free as Effectschainer is free too.
But if you want true stereo =
without=20
risking any Paris bug thing I recommend
the chainer (have I done =
this=20
before ??)

I will try to find some other free way to have =
stereo aux=20
using only free
plugins.
One method coming to mind is by using =
two mono=20

He nice idea !!
Come on Aaron take a week here in Greece, I am 20 minutes away from great
beaches ! for summer vacation.
I have a very nice studio too...

Regarding senderella Tom,
I don't know why your chainer does not save !!
I have made many presets with chainer.

It loads as vst from within Paris and saves as normal vst Paris driven plugin with save and then scroll down copy to library...

This is extremely stable no Paris crshes and yes senderella is ONLY vst !

No dx here only vst.

I remember some old testings but now we have faderworks and more stable Paris with XP by disabling DX !

I am sure DX is causing many problems to Paris.

I am making a project default with 64 chainer instances with 8 senderella auxes inside chainer and a faderworks instance with latency compensation for all 4 eds cards !

You know 14 samples from card1 to 2 and two samples thereafter, so when O load a new project all 4 eds cards are alligned , faderworks is there to delay compensate any further plugins and have 8 senderella auxes for DX auxing !

I can send the preset default (I don't know if it opens with Paris if you don't have 4 cards).

Tom ask me what you want to take you thee where I am...

This also applies to the rest of you !

It is not that difficult !

If you make a default project with all applied then you can work as if you were with a Paris 4 version !

]Regards,
Dimitrios

That all sounds great Dimitrios. Specially the video!

Really, I think we can accomplish this using the newsgroup.

I'll be asking all kinds of questions when I get stumped.=20
Maybe a few pics from your beaches in Greece would be=20
a nice addition.

He =

nice=20

idea !!
Come on Aaron take a week here in Greece, I am 20 minutes =

away from=20

great
beaches ! for summer vacation.
I have a very nice studio=20

too...

Regarding senderella Tom,
I don't know why your =
chainer does=20
not save !!
I have made many presets with chainer.
It loads as =
vst from=20
within Paris and saves as normal vst Paris driven plugin
with save =
and then=20
scroll down copy to library...
This is extremely stable no Paris =
crshes and=20
yes senderella is ONLY vst !
No dx here only vst.
I remember =
some old=20
testings but now we have faderworks and more stable Paris
with XP =
by=20
disabling DX ; !
I am sure DX is causing many problems to =
Paris.
I=20
am making a project default with 64 chainer instances with 8=20
senderella
auxes inside chainer and a faderworks instance with =
latency=20
compensation
for all 4 eds cards !
You know 14 samples from =
card1 to 2=20
and two samples thereafter, so when O
load a new project all 4 eds =
cards=20
are alligned , faderworks is there to
delay compensate any further =
plugins=20
and have 8 senderella auxes for DX auxing
!
I can send the =
preset=20
default (I don't know if it opens with Paris if you
don't have 4=20
cards).
Tom ask me what you want to take you thee where I =
am...
This=20
also applies to the rest of you !
It is not that difficult !
If =
you make=20
a default project with all applied then you can work as if you
were =
with a=20
Paris 4 version !
]Regards,
Dimitrios

Hey Tom,
The beaches here are some of the best wherever !!
We can collaborate ,you can bring some of your clients doing some recordings/mixing
and doing vacation also !
In price vacation will be included ! hehe...
I have a very good sounding and looking control room and a nice recrding
room , Paris , Focusrite isa 220 two channels, Avalon M5, Demeter stereo
tube preamp, great microphones...
Ok I got carried away with this...

Regarding senderella I need your tests too because there are parts that I
may not have tghought and things can get better !

One nice thing with faderworks is that all my 64 Paris channels are now phase
alligned !!
I like that !!

Cheers,
Dimitrios

If you guys are all serious about this, let's poll the group and figure out expenses for a trip like that and figure out if it's doable
I'd love to see Greece and Pick D's brain while I'm there :)

Dimitrios,
I have been following this closely. I still use Paris during mixing primarily
as a mix only bus, but between FaderWorks and Senderella, I may have to reconsider
Paris as a primary mix DAW.
I will be out of state for the next two weeks, but when I get back I will
jump in and help with some tests.
Gene

Gene, how are you using Senderella? I have not found a Mac O/S 9 version.

Whew! A lot of information to wrap my brain around. I think it is time for Paris DVD - Part 2, starring Dimitrios. Hey Aaron! Up for a week in Greece?

Thanks Dimitrios-

My Paris rig is at another location currently, but I will try some of this out when I get to it. Thanks for all your energy! It is much appreciated.

Hi Dimitrios! Thank you for all your efforts. I was able to find a Mac OSX version. Unfortunately, Paris will only run on Mac OS 9. Is there a Mac OS 9 version?

Thanks

Hi,
On the zip I uploaded is there any OS9 version ?
If not then I guess it has not one...
I have heard though that jack is a similar mac plugin , do a search as I don't have any mac, never had, so maybe you can experiment with it.
Anyway why don't you get a cheap old 200\$ PC that can run your Paris rig ?
This will be a wiser choice ,I guess...
Regards,
Dimitrios
