Anybody know where I can download Paris 3.0 for the PC ? - it doesn't seem to be on the ID site.

My studio got flooded out with H-Katrina and I'm just now getting to the point of setting stuff back up.

Luckily I took the Paris stuff out of the racks in the studio otherwise it would have been under water!

Thanks
Andrew

Hi Andrew,

Sorry to hear about your studio. I just got back from a week in New Orleans and received a personal 3-1/2 tour from one of our folks there. I cannot believe the devastation and the poor (or complete lack of) response by the government.

I cannot locate anywhere to download the 3.0 software. Manuals are available at ID's site but no executables. Did you try sending an email to support@intdevices.com? They may still have the programs on their server.

I believe that Morgan at East Coast Music also has 3.0 for sale. Please let me know if you can't get any assistance and I'll see what I can do for you.

Best wishes!

Mark
