---

I've got an upcoming recording project, and want to use an external converter (Lavry Blue) with my MEC and IF442. How do I set up the system so that the Lavry is the master clock source?

Do I need to use T connectors into the MEC and IF442 sync ins, and use a 75 ohm terminator? Or, can I just go from the Lavry sync out to the Mec Sync in, and then Mec sync out to the IF442 sync in?

Cheers

Kris
